Profile

Full-Stack Software Engineer with two years of practical experience and a passion for new ideas, solving complex problems, and writing high-quality software.

Employment History

Jun 2019 — Present

Wilmington, NC

Associate Software Engineer at nCino

2020 Release 1 - Commercial Pricing

Planned and implemented a high-priority new pricing and profitability feature using Lightning Web Components and Apex.

2019 Release 2 - Commercial Portfolio

Wrote high-quality software in Apex to facilitate the business logic requirements of the complex nCino data model. Used Angular to create and maintain seamless user experiences.

2019 Release 1 - Security Initiative

Helped develop and maintain secure coding practices at nCino. Patched critical security flaws and upgraded insecure dependencies.

Oct 2018 — Jun 2019

Wilmington, NC

Software Developer Intern at nCino

Wrote production code in Apex and JavaScript. Gained skills in front and back end development, unit testing, agile, teamwork, and communication.

May 2018 — Aug 2018

New York, NY

Product Support Intern at Liquidnet

Wrote Python scripts to automate tasks including hardware monitoring, report generation, and FIX message parsing.

Education

Aug 2015 — May 2019

Cum Laude

University of North Carolina at Wilmington

BS Computer Science

May 2015 — Apr 2019

Cum Laude

University of North Carolina at Wilmington

BS Business Administration
